Subject: UBER

I just want to say that I feel 10 times safer during and Uber ride than I ever have in a taxi in Charleston. I have lived in Charleston all of my life and it can be a nightmare sometimes to get a taxi from Downtown into Mt. Pleasant late at night. This leads to me testing my limits as to how much I can drink before I have to drive home. Is it the wrong thing to do? Absolutely, but I have sometimes had no choice. This hasn't been an issue since Uber came to town. The idea that Uber drivers are regulated is absurd. I have twice been ripped off by cab drivers and once have a yellow cab drive pass out at the wheel while driving through an intersection. Can you imagine how scary that is? When I called to complain about these incidents I was basically told to not worry about it. What kind of regulation is this? If any of these incidents happened during an Uber ride that driver would never be allowed to drive for them again. Not to mention that it is nearly impossible to get ripped off since everything is done through their App.

I would like to reiterate that I have absolutely no faith in the cab system as it stands and fully believe that Uber has kept me from driving when I shouldn't on numerous occasions. I make many mistakes just like the next guy, but I least with Uber around I don't have to worry about drinking and driving being one of them.

Even our Governor says you are out of line. Keep govt out of the freedom of choice. You are not serving the public. You are trying to restrict their rights.

Subject: Uber in South Carolina

To Whom It May Concern:

I was informed that hat the South Carolina Public Service Commission issued an order recently directing Uber to cease and desist operations. I would just like to express my opinion and request that Uber and other safe ride companies be allowed in the state. I recently relocated to Florence, SC and travel around the state frequently for both business and recreational activities. Uber and safe ride companies have been extremely helpful in my travels as I am often in unfamiliar areas and have had extreme difficulty finding a taxi cab service. The current taxi services are unreliable and often to do not seem safe for a young female like myself often traveling alone. I just believe that the more options available, the better. Also, a nationally recognized company like Uber makes me feel much safer than a random taxi company in smaller towns in the state when often taxis do not even have paperwork or do not accept credit cards. I understand that a lot goes into decisions like this but this is a very important cause for me so please let me know what I can do to help the safe rides availability in South Carolina grow.

Thank you,
Nicole Wampole

Subject: Our right to ride!

We have the right to ride and free to choose how we ride. Government should listen to the people and companies. I have a policy that says we can only choose Uber when we travel. If I use something else I have to incur the cost. I have a home in South Carolina and need to take Uber home from the airport! Please listen Uber is an awesome service for me and an awesome example of free enterprise in America!

Subject: Uber

Dear to whom it may concern I'm writing this email in regards about the uber services. I have a disability,I use this transport service to get me back andforth it's safe because I Know who is transporting me the drivers car is well kept and clean and it's different from using cabs. Cabs usually have me waiting and sometimes the cars are smelly and some are not in good condition. It would be very disappointing to lose such a convient tool here in South Carolina.

Yours truly,

Patrick Slater
